

RoHS Compliance Statement

In an effort to reduce or eliminate environmental pollution and improve the quality of human health, the European Union (EU) has adopted Directive RoHS 2003/11/EC and RoHS Directive 2002/95/EC. Any product manufactured by Quality Thermistor, Inc. that is identified as “RoHS Compliant” on our product drawing and/or original factory packaging is deemed RoHS compliant as determined by our component manufacturers and independent testing when available. We have obtained and will continue to obtain “Certificates of Compliance” from our supplier base indicating component conformance to the Directive. Quality Thermistor, Inc. to the best of its ability, certifies that all items indicated “RoHS Compliant” on its product drawing and/or packaging are compliant to the RoHS Directive. Quality Thermistor, Inc. further certifies that restricted substances are not knowingly added to the final products. To the best of our knowledge (information provided by suppliers), the stated component(s) is/are compliant with the RoHS directives. The markings below are the only acceptable markings for designation of compliance.

This document together with the component drawing or original packaging serves as the certificate of compliance to the RoHS directives.
